

**40 CFR 63.460**  
**National Emission Standard for Halogenated Solvent Cleaning:**  
**Compliance Overview for**  
**Batch Vapor and In-Line Machines** June 1998

The National Emission Standard for Hazardous Air Pollutants (NESHAP) for Halogenated Solvent Cleaning is a federal regulation that affects facilities with solvent cleaning machines. What your facility must do to comply with this NESHAP depends on the type of solvent cleaning machines that you use.

This fact sheet provides a general overview of the **compliance options for batch vapor and in-line machines**. These compliance options are described more fully in separate technical fact sheets. Additional fact sheets describe other aspects of complying with the NESHAP. State and local regulatory agencies may have additional requirements. For additional technical information, call the Small Business Assistance Program (SBAP) at the toll-free number below for free and confidential help. For general information about air emissions regulations, contact the Environmental Ombudsman Unit at the toll-free number below; their assistance is also free and confidential.

**Compliance Options**

Operators of batch vapor and in-line machines have three options for complying with this NESHAP, as shown in the graphic below. Use the detailed information in the technical fact sheets for each machine type and compliance option to determine which compliance option is appropriate for your facility. The SBAP recommends that facilities evaluate the Overall Emission Limit option first, since it is the least complicated means of complying with the NESHAP. Note that options 2 (Control Combinations) and 3 (Idling Limit) also require complying with the design and work practices.

**Need more facts?**  
For technical assistance and for help with permitting, call the Small Business Assistance Program (SBAP) of the New York State Environmental Facilities Corporation  
**(800) 780-7227**  
For information about regulations, compliance financing assistance, and assistance resolving regulatory difficulties, contact the Environmental Ombudsman Unit of Empire State Development  
**(800) 782-8369**  
Both offer free and confidential assistance to small businesses.
